

Statement

- from PT-Actuator

Recently, Thanos, the founder of AMC Controller, made seriously untrue remarks in relevant industry forums and PTA customer groups about the lack of firmware fees.

PTA stated the facts as follows:

We both agreed that they ship the boot-loader to us and we are responsible to manufacture the controller board by ourselves and we pay them the stable firmware fee price as we discussed.

PTA will pay Thanos firmware fees monthly, and the billing date of each month is from 20th to 30th , please see the payment proofs below:

▲ In the first quarter of 2024, we will release the UDP/CANbus/EtherCAT all multiple in one motion system with the property rights which belong to PTA.

The best feature of this new revolution:

- All Scorpion series upgraded to GT version(haptic effect module inside)
- Easy wiring management(No more complicated power and encoder cables)
- DC48V electronic system(No EMI/EMC issue)
- Flexible user friendly closed loop sim gears upgraded port(Max. 15 sim gears)
- All connections by only one pair of LAN cable
- AC 100V to 230V universal power supply of 3KW
- Dynamic monitoring payload display at the driver unit

To all PT Actuator customers, we have and will continue to support you !
